(Appendix in the German edition of Oscar Magocsi's fourth book „About My Space Friends“: Transcription of Oscar Magocsi's lecture at the '14th Intercontinental Internal Congress of UFO Researchers', June 26-28, 1987 at the Penta-Hotel in Wiesbaden.)

The title of his lecture was:

## **"Epoch End Time - The Way to Cosmic Evolution"**

*Lecture by Oscar Magocsi at the '14th Intercontinental Internal Congress of UFO Researchers', June 26-28, 1987 at the Penta-Hotel in Wiesbaden.*

1st lecture:

Dear friends here in Germany, I would like to thank Mr. and Mrs. Veit for the friendly reception and the invitation. First and foremost, however, God, for he made it possible for me to come here to you. I was also asked by my space friends to bring you greetings from the Space Brothers here, who are attending this 14th Wiesbaden UFO Congress!

I come from Canada, as you know. But I was born in Hungary, where I lived for 29 years, until 1956. I work as an electrical engineer for the CBC television company. My belief in technology was unshakable for me, because I was confronted with it every day. So I what, if you will, a scientifically minded person. But my view of it changed quickly when, in 1975, 12 years ago, I had my first contacts with space

---

brothers from another galaxy. I found out, that reality is much more complex than we commonly imagine ...

But how do we get to where neighboring civilizations have already gone? The way is "Cosmic Evolution". We are already doing wonderful things today, but we should be aware that this is only a beginning. Soon our technological and engineering-scientific orientation will advance into another dimension, into another spectrum of the world, where we will deal more with spiritual and mental powers. We are all the creatures of the one God, his children. There is only one God. Whether on earth, on other planets, other galaxies, or in other dimensions. Many may have a different name for him, but it is the same God.

The planet Earth has 'elder brothers' who are jointly responsible for our planet, among them is the 'ASHTAR COMMANDO'. The more highly developed planets of our Galaxy belong to the 'Galactic Federation' and it is the most ardent wish of all its inhabitants that at some point in the near future, Earth will also belong to this community. The spacemen, whom I met for the first time 12 years ago, came from a federation of interdimensional worlds, not only as representatives of the Galactic Federation, i.e. those worlds which we can see through the telescope. The Ashtar Command has asked many of the larger star systems to assist Earth in case an evacuation of the Earth's population becomes necessary. These are the main reasons for the delegates of the Intergalactic Federation to be here. The various but few representatives and directors who run the program on Earth must be privy to many earthly things. They are very concerned about what Mr Tide- mand/Norway also mentioned yesterday, namely the spread of negative forces. They want these forces to be driven off planet earth. It seems that this work is taking place at all levels, whether it is a lower or higher level of space. The individual person is essential, because everything is built upon the individual. We are all brothers, without regard to nationality, without regard to planetary or galactic origin ...

The experiences that I had, you have surely read in my book 'My Space Odyssey in UFOs', which was published in German by Ventla-Verlag. But in the meantime a lot has happened. In the meantime I had more meetings with my space friends, about once a year or even more often. The mission of the spacemen is not to build up a new religion, but to prepare people for something new, grandiose. So it is your and my task to prepare the people for the arrival of the visitors from outer space, who come to our aid in case of severe global catastrophes and cataclysms. This is very important work. It is carried out by many professionals. Those who speak to you here and who organize such congresses and people like you here. The main thing is that the help is given. What we all want is a better world, a better civilization. We want to build new things, to gain new knowledge, to realize more spirituality in our lives. In short, to achieve more quality of life. Whatever we do, we are supported in everything by our

---

space brothers, whether from the solar system or from other galaxies. They help us to finish the work we have begun. The closer the end of this century comes, the closer we come to this change in the epochs of time.

The pioneer of this work was George Adamski. It was he who first made contact with spacemen 40 years ago. He proved to us that the so-called 'UFOs' are actually materially constructed spaceships from other worlds. But people did not understand. Their mental horizon did not reach so far to understand, just as Jules Verne described 100 years ago machines that nobody understood in his time. After 40 years of technical development, we are more advanced, we understand much more about technology than we did then. The world is opening up to us more and more. We have electronics, we travel to the moon! It turns out that this dimension in which we live is not the only one, and that there are many other dimensions, as can be seen for example in Giorgio Dibitonto's book 'Angels in Star Ships'. There we are told about "angels" who come to us in spaceships. Well, Adamski could not write about this 40 years ago. Heavenly beings will one day give us much higher knowledge. Creation is immense. And it's gonna take a long time to understand the universe. There is no shame in making mistakes, as an individual or a nation. By recognizing the mistakes and the good, we grow. What is important is the good intention in the heart to help the brothers from other dimensions, that is, to help God. We should continue this hopefully for a better world.

Second lecture:

## **„Initiation of the pioneers for the new light transformation of the Earth“**

(...) As you may know, there are 100 billion stars in our galaxy alone. Millions of them have planetary systems. Millions of them carry higher life. And that's just our galaxy, the Milky Way. In creation space there are countless. In this century alone, we have been visited by more than 100 different civilizations. Of course, I'm only talking about human-looking kinds of civilisations. Some of these higher civilizations come to us on Earth and give us their knowledge. They are called 'Star-People'. Many star people are already on this planet. Some of them have been brought here at a very early age. Others incarnate from higher worlds. One thing is clear, we too will and we should become star people one day. It is only a matter of time. Most of us have been induced to incarnate on this planet, at this time. One essential reason is that we all want to help humanity. There are over 300 people in this room and remember that there are many millions of people in other countries who have not even heard of what we are talking about here today.

There are a lot of good and sincere people here. We do not have to be star people to

---

be good people. God has many helpers. But the Space Brothers informed me that you are among the best here - in Germany. However, you must remain so. Tomorrow you could make a mistake or do something wrong, so there is no guarantee. But through prayer and meditation we can get guidance from higher forces. Of you, ladies and gentlemen, the space brothers say that you are the ones who will be saved this time. But only if you continue to act correctly. You will be taken to safety, you will experience the new world and the golden age. In the meantime, we will have a lot of disasters, including Armageddon and the Apocalypse.

That will be the process of cleansing from the evil things, the redemption of the karma of humanity. But you will be evacuated in case of danger. A lot of books have been written about the evacuation and the details. The best in the USA is TUELLA's 'Project World Evacuation'. You will be saved! When and how it happens is not important. You will be taken care of. We, the so-called 'star helpers', will help when the riots come. Our reward is that we did it, from our hearts. It is God's will to help others. This mission is our work. For this reason we have many contacts, many connections with other space beings.

Now I have to tell you something that my space friends have asked me to tell you, right here and now. For all of you here, every single one of you. This is not a random event. You may say you've never seen a UFO, but that's not true. You've seen UFOs. All of you have seen UFOs. And you've all been in spaceships at an early age when you were infants. You just can't remember...

People who are destined for the new world, for the new age, shouldn't worry about not being 20 years young anymore, because another promise is that after you go to the new world, you will get a new body in which you will look like you did in your best times, maybe even better. Whatever ailments you have, everything will be corrected. You will be completely healthy and fine. This time that you are going into will take 1000 years, and that in a healthy body. Those who need it will experience an 'early evacuation'. This is a promise, not only from the Space Brothers, but from other, even higher places and it will happen.

We contactors who are here know that we are in good hands. But the rest of humanity needs our help. We, too, will feel a lot of turbulence and anxiety. The change will come, but our space brothers want to make it easier, easier for us. We, you who have gathered this Sunday morning, have a privilege, but also an important task. We must spread the light from our hearts and help others. This is our duty to our brothers and sisters, indeed to all humanity. God bless you all!

(Long-lasting, minute-long applause follows the lecture. Many guests rise from their seats...)
