

Letter from Oscar Magocsi to Eva Groenke, December 1998

...Otherwise I am away a lot on various missions with my Space Friends. Rescue work, humanitarian help from aboard the Spaceships. When I am on duty, it is 4 hours on, 4 hours rest when I can watch any TV programmes off the satellites, or just have a little nap. Never a dull moment for over the „work“ in the control-rooms and on the bridge is very fascinating.

I just got back early November from a two and a half weeks „trip“. Some of it was spent on a giant ship's conference center with many delegates speaking from 92 different planets to be transformed soon like our Earth. But most of the time was used for the yearly „retraining“ on navigating and piloting the many different type spacecraft through the various dimensions.

Now, beeing back, it's time to take care of my personal life and the many routine stuff we all have to do, besides getting prepared for the Christmas and New Year Holidays.

So, that's it for now. If you don't get a fast replay to your letters, please be patient. I just may be away on a mission, or in the middle of some busy stuff.

Lots of love
your friend Oscar
