
Preface by Oscar Magocsi to the German edition of „About My Space Friends“:

I was asked by the German publishers, Karl and Anny Veit, if I could get a word from my space friends for the German edition of the book. Yes, I am sending it with this! I was still thinking about how I could ask them for it, when they already surprised me with it and handed it over to me without me having asked for it before. I don't know how they knew about it - and they only smiled when I asked them. It's only been two days!

It was May 14, 1989 - a warm Sunday morning - when I was walking on the shores of Lake Ontario in Toronto. Someone was waving at me from an elegant yacht that was moored at the quay. It was Argus! As I boarded, my friend from outer space led me to the wheelhouse where I found Don Miguel at the wheel. Immediately afterwards, we set sail towards the nearby Central Island. For about half an hour the three of us had an important conversation there before I was brought back ashore. Message to the German publishers and the German speaking readers all over the world, from Quentin, Argus and Don Miguel:

"We, your friends from outer space, send you our greetings - and at the same time our heartfelt thanks for your faithful support over the past 33 years in promoting the great cosmic UFO cause by awakening and raising public awareness on your planet.

It is to be hoped that the worst time for the benevolent people is over. The changes that are about to take place are on the whole rather positive, and the growing light will eventually make everything bright and new - without too much hardship for the people of good will, due to the changes that will conclude the millennium. We look forward to this for your sake and for ours, on behalf of God and the great Space Federation."

(Toronto, 16 May 1989)
